

47th Nutrition Month Prayer

Almighty God, we come before giving you honor, praise, and bringing our petitions to your throne. We thank you for the gift of life and for being our hope amid these challenging times. Thank you for keeping us safe and for giving us another year to celebrate nutrition month in our country.

We ask for unity in our nation as we support the 47th Nutrition Month campaign with the theme: *Malnutrisyon patuloy na labanan, First 1000 days tutukan!* We pray that you gather all the stakeholders and for them heed to this call. May we have the expectant endurance to continue the long-standing fight against malnutrition by fixing and focusing our attention and efforts on the first 1000 days of life. We humbly ask that we journey together as a nation and acknowledge our individual and collective roles in nurturing the next generation.

Almighty God, bless the mothers and fathers and their extended families with wisdom and knowledge in taking care of their children. May they always find the desire to learn, be determined to follow correct nutrition advice, and maximize available nutrition programs so their children can achieve optimum growth and development. Fill them with the love and support from You and people around them, that it will overflow to the young ones. Meet all their needs to support their growing child as we know that you are their ultimate provider.

47th Nutrition Month Prayer

Bless the whole government of the Philippines, the people in authority, nutrition workers, and nutrition partners in the academe, business, civil society, development and donor partners and non-government organizations. Bestow upon them godly wisdom and strength as they develop and manage nutrition programs. May they never run out of sound ideas to bring positive nutrition outcomes for the country.

We pray for more leaders who will stand up and put nutrition as their priority agenda. May this nutrition month campaign be a turning point for them to invest in nutrition and believe that good nutrition is good governance.

Ultimately, bless the Filipino children abundantly. Position the right people to be your hands and feet in providing utmost care, nourishment, and protection from the moment they were conceived up to two years of age and beyond.

Finally, thank you for loving the children even before they were formed. Thank you for your grace and for the truth that you hear our prayers. May your name be lifted high.

We ask these in Your mighty and sovereign name. Amen.

47th Nutrition Month
MALNUTRISYON
PATULOY NA LABANAN,
FIRST 1000 DAYS
TUTUKAN!
